Subject Matter of the Construction Contract

Contract Price

Contract price is the amount of money that the owner agrees to pay the contractor for the construction of the project. It is the sum of all the costs that the contractor incurs in the process of construction, including the cost of materials, labor, and overhead. The contract price is typically negotiated between the owner and the contractor before the construction begins. It is important for both parties to understand the contract price and the terms of payment before entering into the contract.

The contract price is typically based on the estimated cost of the project. The contractor will provide a detailed estimate of the costs, including the cost of materials, labor, and overhead. The owner will then review the estimate and negotiate the contract price. Once the contract price is agreed upon, the contractor will begin construction.

The contract price is typically paid in installments. The owner will typically pay the contractor a percentage of the contract price at the start of the project. The remaining balance will typically be paid in installments as the project progresses.

REASONS FOR AND BENEFITS OF ENTERING INTO THE CONSTRUCTION CONTRACT

There are many reasons for and benefits of entering into the construction contract. The most common reasons are:

- 1. To ensure that the project is completed on time and within budget.
- 2. To ensure that the quality of the work is maintained.
- 3. To ensure that the contractor is paid for the work they have completed.
- 4. To ensure that the owner is protected from the risk of the contractor going bankrupt.
- 5. To ensure that the owner has a legal right to the completed project.
- 6. To ensure that the contractor is responsible for the work they have completed.
- 7. To ensure that the owner has a clear understanding of the contract terms and conditions.
- 8. To ensure that the contractor is aware of the owner's requirements.
- 9. To ensure that the contractor is aware of the risks involved in the project.
- 10. To ensure that the contractor is aware of the benefits of entering into the contract.

The diagram illustrates a two-stage sampling process. At the top, a large circle is labeled 'N'. Inside this circle, a smaller circle is labeled 'n'. Inside the 'n' circle, an even smaller circle is labeled 'm'. Arrows indicate the flow from the population 'N' to the sample 'n', and from the sample 'n' to the subsample 'm'.

Figure 1

$$B$$
$$C_{\text{total}} = C_{\text{total}}^{\text{in}} + C_{\text{total}}^{\text{out}} = 1000000 + 1000000 = 2000000$$
